

WOMBAT RESCUE

You think you know what cute is? You haven't seen cute until you've spent time with one of Australia's cuddliest _____: the Wombat.

Tim Faulkner, Director of the Australian _____ Park has spent many an hour caring for these beautiful _____ friends. The problem, however, is that each wombat he comes in contact with has its own sad tale. Usually, because the joeys mother had been hit by a _____.

Wombats give birth to _____ young. At birth they are furless & the size of a _____. They are protected in the female's _____ for up to 5 months then they start to emerge but not fully until 12 months old. They joey stays with the Mother for up to 2 years in which time is taught to dig _____, search for food and be bush aware. "You can imagine how difficult it would be for a young Joey to survive without all these _____" said Tim.

Tim has had to raise young Joeys from as young as three months old and at this age they are the size of a _____. He would have to feed the baby every three hours on a special Wombat milk powder until it was ready to graduate from Wombat Finishing _____.

When the _____ are big and strong enough, they sent to Cedar Creek Wombat Sanctuary to live as _____ wombats in an environment that allows to to socialise with other wombats whilst _____ them within the large sanctuary.
